

Zenobe announces partnership with Newport Transport and Yutong on first 15 vehicles under its new funding scheme

29th May 2019

The first operator to receive an investment from our [£120 million funding scheme](#) is Newport Transport, who are using the investment to purchase 15 Yutong E12 electric single-decker buses.

Zenobe will be financing the buses, batteries and infrastructure, as part of our plans to help local authorities and operators rollout commercial electric vehicle fleets.

Steven Meersman, co-founder of Zenobe Energy, said: "We are thrilled to be working in partnership with Newport and Pelican Bus and Coach on these first 15 vehicles"

"We are providing a push-button solution including storage, charging infrastructure, solar PV, a battery service plan for the vehicles that ensures the vehicles continue to go the mileage over their life as well as funding for the vehicles"

The full announcement can be read here, in Coach & Bus Week: <https://cbwmagazine.com/newport-transport-orders-electric-yutong-fleet/>
