

## **ELM Utility Services Expands Operations with Major Charter Contract Win**

ELM Utility Services (“ELM”) is proud to announce a significant expansion following the award of a new contract with Charter Communications, Inc. (“Charter”). This expanded partnership with Charter marks an exciting chapter for ELM, extending our footprint in nine states and reinforcing our commitment to delivering safe, reliable, and high-quality utility services nationwide.

Through this partnership, ELM will support Charter operations across a mix of existing service territories and newly launched states, including:

- Colorado
- Oregon
- Missouri
- Texas
- Kansas
- Nebraska
- New Mexico
- Wyoming
- Washington

To support this expansion, ELM expects to add approximately 500 new employees, creating jobs and strengthening operations across these regions. This growth reflects both the trust placed in ELM by Charter and the dedication of our employees, who continue to deliver industry-leading service every day.

“This contract win represents more than growth for ELM — it is a testament to our people, our culture, and our proven ability to scale rapidly while maintaining the high standards our customers expect.” said Jim Bourazak, CEO of ELM.

ELM looks forward to building strong, long-term partnerships in these new and expanded markets and continuing to invest in our workforce as we support Charter’s infrastructure needs.

### **About ELM Utility Services**

ELM Utility Services is a trusted provider of outsourced utility locating services, serving public utilities across the United States. The Company’s mission is to protect underground infrastructure, ensure safe, reliable service for its customers, and safeguard the public by preventing damage to critical utility systems.
